

Global AI platform powered by the block-chain
For the efficient sharing of equipment, tools,
knowlwdge and skills

ShareTool.io

COLLABORATE

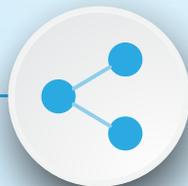

Latest technologies offer us to enable unlimited global opportunities for everyone to enjoy unlimited access to shared equipment, tools, skills and knowledge in a forecasted 3 trillion markets.

TECHNOLOGY-ENABLED FOR B2B, B2C, C2C

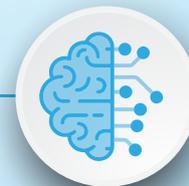

Manufacturers and regional businesses could benefit from new business models.

While end users are in control of their money by sharing instead of buying.

SOCIAL NETWORKING AND MIDDLE CLASS

Sharing economy enable us to collaborate with each other making people more involved in socializing use things we own more often and earn something out of it. Not buying things means more money to spent consequently bigger middle class.

TECHNOLOGY-ENABLED FOR B2B, B2C, C2C

Blockchain as decentralized database enables fast, cheap and transparent transactions. Smart contracts will take place of deals, insurance and deputies. AI will help users of platform grow their business and help making money.

WHY SHARETOOL?

ShareTool offers several advantages compared to traditional sharing-renting platforms.

BUYBACK MECHANISM

The ShareTool contract will replenish a pool of buyback ether monthly and allow people to send SHER tokens into the contract and get ether back. The price ratio at which this would happen would be the one the pre-sale investors got. This means the token could only ever fall to 70% of its ICO-launch.

BADGE SYSTEM

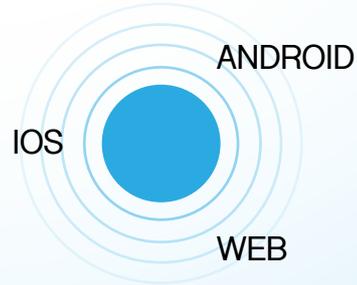

A collectible badge system will be built into the platform.

5 rentals/month = silver badge,
15 rentals/month = gold badge,
20 or more rentals/month
= diamante badge

Collecting badges will enable you all sorts of benefits.

REWARD FOR THOSE WHO HOLD

Holders will be rewarded every month from loyalty program with additional free tokens. Quantity will be determined on the amount of tokens of its ICO-launch price.

- ✓ easy access
- ✓ AI suggestions
- ✓ fast transactions

GLOBAL PAYMENT FLEXIBILITY

With ShareTool, contractors can easily receive earnings globally while end users are able to make payments to contractors anywhere using SHER tokens.

MORE TRUST

ShareTool is built on the Ethereum Blockchain as ERC20 token, with all contracts secured through smart contracts and insurance policies and dispute processes. This promotes highest possible trust.

BUSINESS GROW

With ShareTool manufacturers, businesses and individuals can make a new endless growing business models with all transparency and without stress.

SHARING MADE EASY

Traditional businesses can use the ShareTool platform to grow their customer base and make new business models.

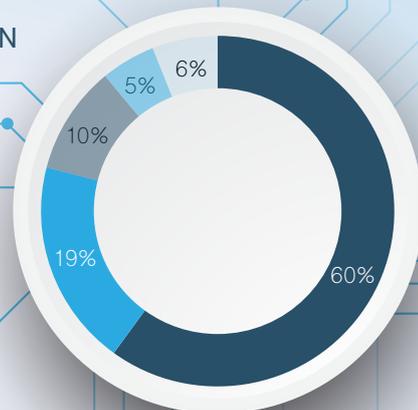

Small scale businesses can use the ShareTool platform to scale their business tasks and build larger networks and new business models like buy and share.

Individuals looking to make side income can leverage the ShareTool platform to share their everyday home equipment and their skills and benefit from tools instead of just having them.

ROADMAP

SOFT CAP

- block-chain based
- dispute algorithm
- sidechain
- insurance
- partial DAP architecture
- personal user white lists
- AI integrated
- multi language
- mobile APP
- multi category
- reward program instead of burning
- tokens
- listed on the one of the top 10
- decentralized exchanges

HARD CAP

- platform FIAT conversions
- SHER nodes (master-nodes)
- ShareTool as DAO
- country specific implementation (10-20 countries)
- listed on the one of the 5 biggest exchanges
